

FACT SHEET

WINDOW IN BACK OF CAB

AWIND-RF Fixed window in back of cab (without curtains)

**An auxiliary rear window results in a better view over areas behind the truck.**

The window is available for the day cab and the sleeper cab and is available with tinted or untinted glass. On the sleeper cab, the window is equipped with a roller blind.

The visible glass area measures 98x35.5 cm.

**SAFETY**

- Provides better direct rear visibility and control over the load area.
