

FACT SHEET

BODY BUILDER ELECTRICAL INTERFACE

Pre-routed wiring and connectors

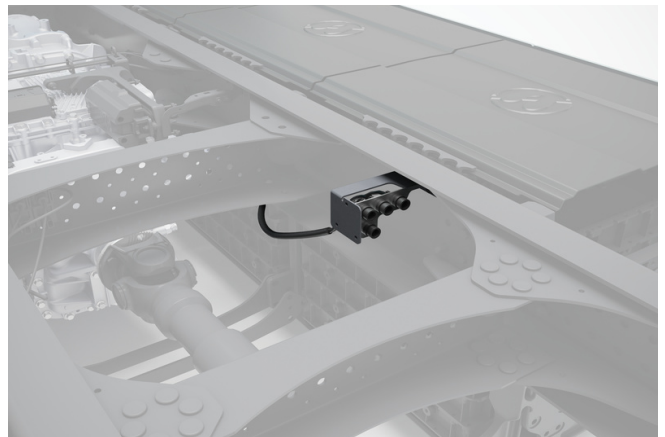

In order to simplify and shorten lead times for body builders, trucks can be ordered with a wiring harness routed from the body builder electrical distribution unit inside the cab to a connection point inside the right frame rail beside the gearbox. The wiring harness ends up in a plugged connector for the superstructure wiring harness connection.

Sales variants

- BBCHAS1** One 7-pole bodywork connector on chassis
BBCHAS3 Three 7-pole bodywork connectors on chassis

PRODUCTIVITY

- Pre-routed wiring for superstructure connections shortens body builder lead times.

BBCHAS3 for battery electric vehicle.
