

FACT SHEET

WARNING LAMPS

Warning lamps

Warning lamps can provide an excellent all-round warning thanks to a number of different optional positions.

They include amber beacons that are of LED type and are impact-resistant. They are equipped with lights and lenses with a very long service life. There are no movable parts in the LED beacons.

The beacons have rotating light according to UNECE R65.

Sales variants

BEACON-P Preparation kit for roof beacons

BEACOA2F Two amber LED beacons on cab front roof

BEACOA2R Two amber LED beacons on cab rear roof

BEACONA4 Four amber LED beacons on roof - two on front, two on rear

SAFETY

- A wide range of warning lamps positions makes it easy to choose a safe solution for every purpose.

UPTIME

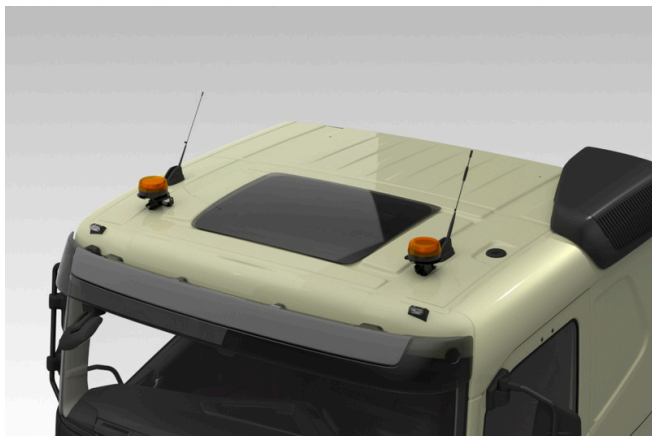

- LED beacons with low power consumption and a very long service life.
- Factory installation reduces lead time, ensures high quality and minimizes the risk of water leakage into the cab.

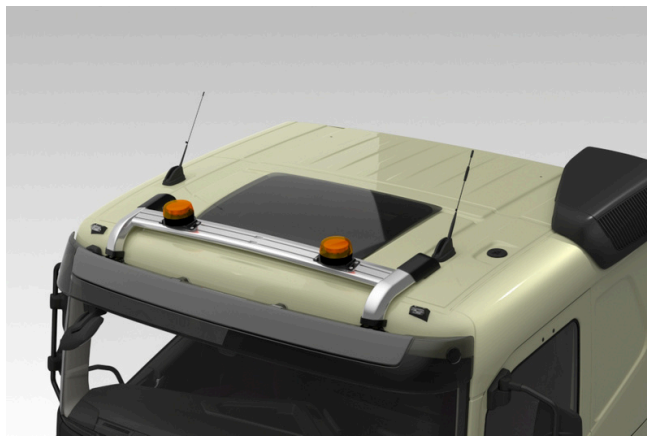

Design of LED beacon.

Volvo FMX Sleeper Cab with BEACOA2R and ACCRB-R.

Volvo FMX Sleeper Cab with BEACONA4, ACCRB-F and ACCRB-R.

BEACON-P – Preparation kit for roof beacons

The preparation kit for beacons on the cab roof consists of one switch in the instrument panel, a pre-routed wiring harness through the front of the cab roof pass-through and a connected relay. Approximately 2 metres of prepared wiring will be transport-fitted on the cab roof to facilitate the installation by the body builder. The maximum load is 300 W.

BEACOA2F – Two amber LED beacons on cab front roof

The set includes two LED beacons, fitted at the front of the roof. The front-mounted beacons are fitted either directly on the roof or on the front roof bar (when this is ordered).

BEACOA2R – Two amber LED beacons on cab rear roof

The set includes two LED beacons. When this variant is ordered, the rear roof bar is mandatory.

BEACONA4 – Four amber LED beacons on roof - two on front, two on rear

The set includes two LED beacons at the front and two LED beacons at the rear.

The front-mounted beacons are fitted either directly on the roof or on the front roof bar (when this is ordered). The rear lights are always to be fitted on the rear roof bar.
