

FACT SHEET

DRIVER SEAT TYPE

DST-CF5

Driver seat FE/FL - Euro 6

The driver seat is a fixed installation and ergonomically designed. The seat belt, available in red or black, is integrated in the seat. Seat anchoring in the floor is reinforced and helps providing optimal protection in an accident.

The seat is available in the following types: two different standard versions and one comfort version. There are several adjustment functions available. See table on page 2 for further information.

The seat upholstery material is dirt resistant, and both a cloth and a vinyl seat cover are available as accessories. Volvo's seats are designed to withstand a weight up to 150 kg.

The control panel, DST-CF5.

DRIVER APPEAL

- Extensive adjustment possibilities make it possible to find and a comfortable driving position.
- Dirt resistant upholstery.
