Dynafleet Driver Times service

---

## Tachograph download

Dynafleet Driver Times automate the download of tachograph memory data and digital driver card data from the truck. Speed file download is also supported. All files are kept in Dynafleet for two years and they are instantly accessible. Files can also be automatically exported to your preferred tachograph post processing software.

## Driver Times Prognosis

The Dynafleet Driver Times Prognosis continuously monitors all drivers' driving and resting times. The remaining driving time is always updated together with information when an infringement is likely to occur. Driver Times Prognosis also enables route planning based on driving and resting time information in the map.

## Driver Times Support for the driver

The Driver Times Support in the truck coaches the driver to comply with the driving and resting times legislation. It warns the driver to mitigate infringements and it also helps to plan weeks ahead. The Driver Times Support is available in Volvo FH, FM, FMX with **MEDIADF** or **MEDIANDF**, and the Tachograph 2.1 or later.

Driver Times Support in the integrated 7" colour display Volvo FH.
