Dynafleet Fuel & Environment service

Fuel Efficiency Report

Dynafleet Fuel & Environment service

Fuel & Environment is the perfect tool in the struggle for lower fuel consumption and reduced environmental impact.

The service offers detailed reports that make it easy to chart potential improvements and follow up – on driver, truck and fleet level.

Sales variants

- DF-FUELM** Dynafleet Fuel & Environment service, monthly subscription
- DF-FUE6M** Dynafleet Fuel & Environment service, 6 months prepaid subscription
- DF-FUEL1** Dynafleet Fuel & Environment service, 1 year prepaid subscription
- DF-FUEL2** Dynafleet Fuel & Environment service, 2 years prepaid subscription
- DF-FUEL3** Dynafleet Fuel & Environment service, 3 years prepaid subscription
- DF-FUEL4** Dynafleet Fuel & Environment service, 4 years prepaid subscription
- DF-FUEL5** Dynafleet Fuel & Environment service, 5 years prepaid subscription

FEATURES AND BENEFITS

- Clear overview of fuel consumption, driven distance, emission levels and much more for vehicles and drivers.
- Improve and maintain the driver fuel efficiency by Driver Coaching (requires **MEDIADF** or **MEDIANDF**).
- Customized reports.
- Monitor the environmental footprint.
- Alerts the fleet manager of significant fuel level changes.
- Automated e-mail reports on a regular basis.
- Follow up driver and fleet performance in the Dynafleet IOS and Android App.

FACT SHEET

Dynafleet Fuel & Environment service

Driver Coaching in the integrated 7" colour display Volvo FH.

There is variety of different reports that can be customized for specific needs. The overview report covers fuel consumption, idling, coasting and usage of I-Shift, cruise control and much more for the vehicles and drivers.

Deviations from a set target are monitored in the exception report. The environmental report shows six different emission related parameters for the vehicles.

Driver Coaching

Driver Coaching guides the driver to improved driving technique through real time Fuel Efficiency Score while driving. Pop-up tips on the screen enables the driver to identify areas where an adjustment to the driving technique will improve fuel efficiency. For use of Driver Coaching **MEDIAADF** or **MEDIANDF** is required.

Fuel Efficiency Score

Fuel Efficiency Score is rated from 0-100 and displays truck and driver performance from a fuel efficiency perspective in four key areas:

- Engine and gear utilization
- Speed adaptation
- Anticipation and braking
- Standstill

The unique properties of the Fuel Efficiency Score enable immediate comparison of e.g. long haul and distribution applications.

The Dynafleet App for quick and powerful follow up of driver performance.

Fuel Efficiency Report and the Dynafleet App

The Fuel Efficiency Report is an interactive tool for analyzing the complete fleet, individual vehicles or drivers. The report overview gives instant feedback on the areas of improvement. Each vehicle and driver are ranked based on their score. The trend report combines Fuel Efficiency Score with fuel consumption for up to 13 months to follow up results over time.

The Dynafleet app* offers the Fuel Efficiency Report on mobile devices and enables drill down to detailed parameters. In the app drivers can monitor their performance, as well as their ranking, compared to their colleagues.

*The Dynafleet app is available on iOS, Android and at m.dynafleetonline.com for Windows Phone.
