

FACT SHEET

FUEL FILLING

FUFF-ATS Fuel filling anti-theft and anti-spillage device

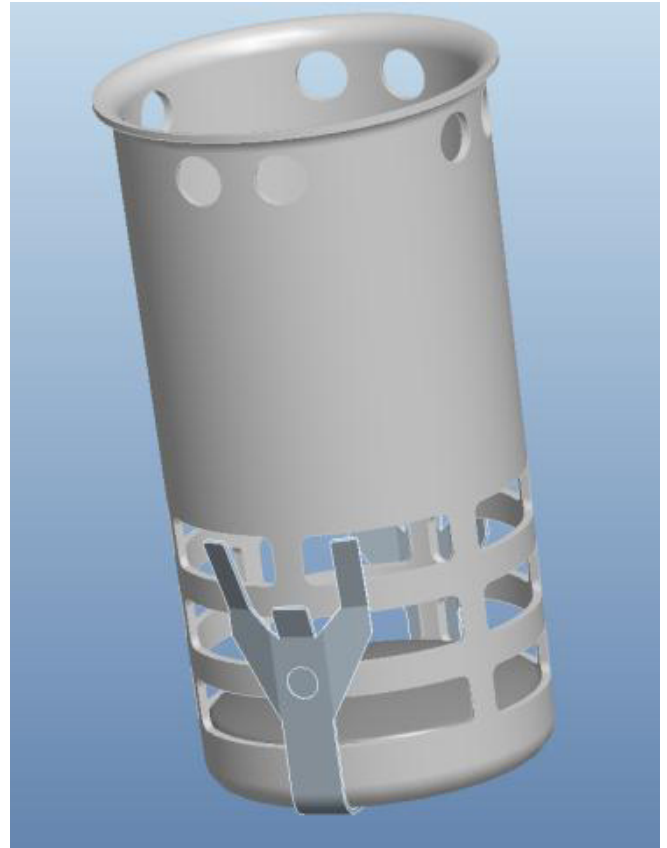

The spring mounted and self closing lid prevents fuel spills.

Fuel filling anti-theft and anti-spillage device

FUFF-ATS consists of a cylindrical and perforated basket with anti-theft function. On the top there is also an anti-spillage device equipped with a spring lid.

equipped with a spring lid. The device prevents siphoning of diesel and secures that no fuel is spilled either at fuel filling or during driving if the tank cap by any reason is missing.

The device is not removable without seriously damaging the tank. FUFF-ATS can be used on all D-shaped metal fuel tanks. The device cannot be mounted on plastic fuel tanks.

FUFF-ATS with anti-theft and anti-spillage function.

SECURITY

- Reduces the risk of fuel theft.

ENVIRONMENT

- Prevents excessive evaporative emissions and spillage, which has a positive effect on the environment.
- Fulfills regulation ECE-R34.
