

# FACT SHEET

## Cab door locking LOCK-REM

Control module on driver's side.

Remote control.

### Central door locking with remote control

A central locking system facilitates locking and unlocking and thereby simplifies entry and exit. The remote control has a range of 30 metres and unlocks the driver and passenger doors in sequence to increase security.

The central locking system consists of a central locking unit, locking motors, remote control (fob) and receiver. The doors can be locked using the door locks, the remote control or via the control module on the driver's side inside the cab.

An approach light function is included in order to increase visibility and provide guidance around the truck when approaching, entering or leaving the vehicle. The following lamps are lit on the vehicle and trailer: position lamps (in headlamps and rear lamps), instep lamp, side-marker lamps, direction indicators and interior light. The approach light function is activated via a separate button on the remote control.

The remote control also activates the main switch if the truck is equipped with the remote main switch (MSWI-R).

In case of a collision, the doors are unlocked as a safety feature.

### Unlock button functionality:

Pressing the button with the Unlock symbol once unlocks the driver's door. Pressing it twice (within 5 seconds), unlocks the passenger door. If the vehicle is equipped with an alarm, this is disengaged with the first press.

### Lock button functionality:

The first press on the button with the Lock symbol locks both driver and passenger doors. If the vehicle is equipped with an alarm this is engaged with the first press. If the vehicle is equipped with a remote main switch (MSWI-R), a second press within 3 seconds on the Lock button will disengage the main switch.

### FEATURES AND BENEFITS

- Comfortable operation of the door locks and main switch.
- Enhanced security due to fast and convenient handling of the door locks.
- Approach lights around the vehicle for enhanced security.
- Very good theft protection.
