

FACT SHEET

Media packages

Volvo media packages

The Volvo media packages are built upon an integrated infotainment and service platform, which provides the possibility to add Dynafleet and navigation support as well as other services to the basic media support.

The audio system included in the media package is developed and optimised specifically for Volvo trucks. It is integrated into the vehicle, which means that several functions can be linked together to operate in an easy and safe way. The driver controls the system with the SID control panel and conveniently placed steering wheel control switches. The system presents its information to the driver on a 7" touch display.

Sales variants

MEDIA Media package

MEDIA DF Media package prepared for Dynafleet vehicle onboard support (requires DF-FUEL, DF-DTM or DF-MSG variants)

MEDIA NAV Media package with Navigation support

MEDIA DF NAV Media package with Navigation support and prepared for Dynafleet vehicle onboard support (requires DF-FUEL, DF-DTM or DF-MSG variants)

FEATURES AND BENEFITS

- Internet connection
- High quality audio system, designed for Volvo
- Wide variety of media sources
- Easy-to-use and conveniently located system controls enhancing the safety
- Possibility to add Dynafleet and Navigation to the system

FACT SHEET

Media packages

7" touch screen

A 7" touch screen is the centre of the media system. It provides the driver with a single point of information and a safe and convenient way of interacting with the system.

Steering wheel switches

The driver controls the media system with the steering wheel switches. These include a "push to talk" button to activate the voice command function.

Voice command

Voice command not only provides a convenient way to control the media system, it also means increased safety since the driver can make the wanted adjustments while keeping the eyes on the road and the hands on the steering wheel.

Integrated navigation and fleet management system

The options include the possibilities to integrate a navigation and/or a fleet management system (Dynafleet) with the media system. That means that the driver has all relevant information efficiently presented in one single display.

High Power Audio System

Audio system with Bluetooth including streaming functionality. USB and line input (AUX) which make it possible to play music via USB and other external audio sources.

DAB Radio

Digital Audio Broadcasting (DAB) radio functionality can be added to a media package. This will provide the driver with a wider selection of radio stations and the possibility to listen to a favorite station anywhere that DAB radio is used.

Dual Bluetooth connections

The system includes two Bluetooth connections, which means that two devices can be connected at the same time.

Connected safety

Connected safety allows drivers to share and receive alerts for hazardous traffic situations from and to those that have the connected safety application.

Internet connection

The driver can get connected to Internet either by tethering through a smart devices (connected via Bluetooth, WiFi or USB) or by using a 3G/4G dongle (USB).

The system includes services for streaming music, Internet radio, web browsing, navigation updates etc.

Pre-loaded services

A media package has a number of pre-loaded services. Some of the services are media package dependent. Maps for the TomTom navigation are updated by the workshop.

Dynafleet service

Connected safety

Navigation by TomTom

Deezer, music streaming service

TuneIn, Internet radio service

Internet browser

Maps, included in Android platform

Conditions and prerequisites

All connected services provided by Volvo are made available during the “useful life” of the Volvo Infotainment & Services system.

The “useful life” means the period during which the system (a) has sufficient memory capacity and other required technical capabilities to utilize data needed in order to prolong the service, and (b) is capable of operating as intended without major repairs. The system will be deemed to be out of service and its useful life to be ended if no updates have been downloaded for such system for a continuous period of 24 months.

The functionality may vary depending on vehicle model, connectivity technology, and other factors. Subscription is subject to change or cancellation at any time by Volvo with advanced

notice to customer. Volvo does not assume responsibility for technological obsolescence of the connectivity or technical capabilities of the system, or for failure to use (non-compliant with Volvo instructions) or misuse (abuse / improper use by reference to the purpose of the product/service) by the customer, or for non-compatibility of the customer mobile devices required for the use of the system (including internet connection availability), or for third party supplier services or products.

Any cost associated to internet connection or updating application invoiced by the phone operator remain at the customer charge, this includes, but is not limited to, services such as Deezer, TuneIn and TomTom navigation traffic services.
