

FACT SHEET

FUEL TANKS

Fuel tanks FL

Fuel tanks

The fuel tanks for Volvo FL are available in painted steel, aluminium and plastic for different applications.

The fuel tanks in aluminium are D-shaped. Owing to this shape they hold more fuel than a round or rectangular tank with the same length and ground clearance. The actual usable volume increase is about 2.4% compared with a rectangular tank. The usable capacity in practice is 97% of the stated fuel tank volume.

ENERGY EFFICIENCY

- The D-shape holds larger volume capacity than a traditionally shaped.
- A wide selection of volumes results in the possibility to choose the optimal fuel tank for every application.

FUEL TANKS

Fuel tanks FL

Fuel tanks:

Volume (litre)	Dimensions: height x length (mm)	Chassis position	Material	Variants
80	463 x 490	Left side/Right side	PL	L80P/R80P
130	463 x 730	Left/Right side	PL	L130P/R130P
150	370 x 880	Right side	AL	R150AL
160	560 x 530	Left side	AL/ST	L160A56/L160S56
210	710 x 530	Left side	AL/ST	L210A71/L210S71
210	445 x 910	Right	ST	R210S
215	520 x 920	Left/Right side	PL	L215P/R215P
300	445 x 1320	Right side	ST	R300S
430 (2 x 215)	520 x 920	Right side	PL	R430P
80	463 x 490	Rear overhang	PL	MFUEL80
130	463 x 730	Rear overhang	PL	MFUEL130

ST = steel

AL = aluminium

PL = plastic
