

FACT SHEET

REFRIGERATOR

REFR-RUS Refrigerator 28-litre, with dividers, on rear upper wall

Refrigerator in the rear upper storage cabinet

This optional compressor-powered refrigerator has excellent cooling properties. The box is crash-tested and satisfies the high safety requirements of Volvo. It features interior lighting, automatic temperature control and battery monitoring.

The refrigerator is installed in the middle compartment of the rear upper storage cabinet (RUS-HIG, option), available for high and extra high sleeper cabs.

The interior volume of the refrigerator is 28 litres and it is equipped with a divider for making storage easier.

A display on the refrigerator shows the temperature and any fault message. Using the minus or plus buttons, it is possible to set the temperature between +2 °C and +12 °C.

DRIVER APPEAL

- Good refrigeration capacity even in very warm climates.
- Positioned for easy access.
- Interior lighting.
