

FACT SHEET

REFRIGERATOR

REFRIG Refrigerator 33-litre, with freezer and dividers, in drawer under bed

Refrigerator installed under the bunk*

This optional compressor-powered refrigerator has excellent cooling properties. Fitted under the bunk in a pull-out drawer, this 33-litre refrigerator features interior lighting, automatic temperature control and battery monitoring.

At the top of the refrigerator, there is a display showing the temperature and any fault message. Using the minus or plus button, it is possible to set the refrigerator temperature between +2 °C and +12 °C.

Practical dividers make it easier to keep things neat and tidy inside the refrigerator. The dividers also enable the use of one part as a subzero area, with a temperature below 0°C.

For trucks with gear shift buttons on the dashboard, the fridge is positioned close to the driver's seat. If the truck is fitted with an I-Shift lever, the fridge is positioned at the passenger seat in order to assure access.

* Available only for Volvo FH and Volvo FH Electric.

DRIVER APPEAL

- Good refrigeration capacity even in very warm climates.
- Useful freezer function.
- Positioned in a pull-out drawer for easy access.
- Generous 33-litre volume.
- Dividers make it easy to keep the fridge contents in order.
- Interior lighting.
