

FACT SHEET

STORAGE UNDER BED

RLS-BAS Two storage drawers under bed, totally 130 litres

Two storage drawers under the bunk.

Two storage drawers under the bed

Two spacious, extendable drawers with large and ergonomically designed handles are available for all sleeper cabs. The drawers are centrally positioned under the bed, making them easily accessible by both the driver and passenger.

The split between the drawers is approximately 60/40% in width, resulting in a total volume of 130 litres.

Behind the smaller drawer, there is an additional storage space of about 20 litres. If a safety box (SAFE – FH only) is specified, this space is occupied. The large drawer can be equipped with a 33-litre refrigerator (REFRIG – FH only).

The drawers have no key locking device but are locked in their closed position, staying in place during driving and featuring a firm stopper in the outer position.

DRIVER APPEAL

- Spacious and easy accessible storage under bed – approximately 130 litres in total.
- Prepared for installation of additional equipment, e.g. safety box and refrigerator.
