INFORMATION PACKAGE

INFOHIGH Information package, high (with side display)

Volvo FH16 with side display

Volvo information package

The Volvo information package high is centred around the infotainment platform and the displays. The service platform provides the possibility to add Volvo Connect services, Sygic Navigation support and future services.

The integrated functions are designed for easy and safe operation.

Information is presented to the driver on the 12" instrument display, and on the 9" side display with touch functionality.

The audio system is developed specifically for Volvo Trucks.

INFOHIGH

This variant includes a side display, which is mandatory in order to fulfil the General safety regulations (GSR) requirements in the EU.

The information package also features:

- Fully dynamic instrument display.
- Possibility to connect one device via Bluetooth.
- Driver Times Support Basic, including driver time details and custom alert. See Driver Guide for more information.

DRIVER APPEAL

- 9" side display with touch functionality for easy access and visibility of functions.
- Driver-centric design.
- Internet tethering.
- High-quality audio system designed for Volvo.

PRODUCTIVITY

- Possibility to add Volvo Connect services and Sygic Navigation to the package, which enables enhanced transport planning and facilitates communication between the office and the driver.

SAFETY

- Easy-to-use system controls improve road safety.

INFOHIGH Information package, high (with side display)

Information package components

9" side display

The side display with touchscreen functionality is the heart of the information system. It is included in the INFOHIGH package and provides the driver with a safe and convenient way of interacting with the system. See Driver Guide for the specific truck, which is accessible in the side display.

Volvo FM with side display

Camera options

Depending on the truck specification, INFOHIGH can offer six digital cameras and one analogue connected to the side display. The side display can show up to four views at the same time. In the side display the view of the passenger corner camera is also presented, it shows the blind spot of the passenger side front corner.

Selected audio system

The standard audio system with Bluetooth with functionality for streaming services are available within the information package and is compatible with all audio systems. The audio system has a rated outlet of 4x25 W.

USB-C connection

The Volvo FH has six USB-C ports, and the Volvo FM has four. The USB-C ports are easily accessible and can be used to connect and charge devices. The supplement of USB-C connections is provided through the information package.

12" dynamic instrument display

The information package includes an instrument display that shows all driver information in up to four pre-defined instrument views, depending on package and specification:

Focus view

Analogue view

Load view

Navigation view

Volvo Connect in Vehicle

Volvo Connect in Vehicle is the driver's tool for accessing Volvo Connect services. It features, for example, **Driver Coaching**, **Driver Times Support**, **Sygyic Navigation** and **Messaging** depending on the ordered Volvo Connect Services.

Volvo Connect in Vehicle is included in INFOHIGH. For more information, see respective fact sheet.

Internet connection

By tethering through a smart device (connected via Bluetooth, Wi-Fi or USB-C), INFOHIGH offers the driver to connect to the Internet as an optional addition.

Apple CarPlay and Android Auto

INFOHIGH offers support for Apple CarPlay and Android Auto. These are smartphone integration systems that mirror essential phone apps (navigation, music, calls, messages) onto the truck's side display.

Extended audio system (option)

INFOHIGH offers an updated audio variant as an optional upgrade. The enhanced audio system provides increased power and sound quality by producing clearer and more powerful bass frequencies. The deeper and more impactful bass allows for a richer listening experience. AUD-EXT is only available for Volvo FH/Volvo FH16.

AUD-EXT Extended audio system including amplifier and subwoofer

Audio system speakers (option)

The information package provides the opportunity to upgrade the audio system speakers. The speakers are specially designed for Volvo to deliver a rich, deep and realistic sound. The number of speakers depends on the cab type and the option that you choose.

SPK-DADO Loudspeakers in the dashboard and doors

SPK-DDR Loudspeakers in the dashboard, doors and rear

DAB radio (option)

Digital Audio Broadcasting (DAB) radio is optional in the audio system. DAB/DAB+ radio gives the driver a wider selection of radio stations and the possibility to listen to their favourite station anywhere DAB/DAB+ radio is used.

AUDS-AD AM/FM/DAB/DAB+ receiver

Conditions and prerequisites

All connected services provided by Volvo are made available during the "useful life" of the Volvo Infotainment & Services system.

"Useful life" means the period during which the system (a) has sufficient memory capacity and other required technical capabilities to utilize the data needed to prolong the service, and (b) is capable of operating as intended without major repairs. The system will be deemed to be out of service and its useful life to be ended if no updates have been downloaded to the system during a 24-month period.

The functionality may vary depending on the vehicle model, package and other factors. Subscription is subject to change or cancellation at any time by Volvo following advance notice to customers. Volvo does not assume responsibility for technological obsolescence of the connectivity or technical capabilities of the system, or for the customer's failure to use or misuse (abuse/improper use) of the product/service in accordance with Volvo's instructions or its intended purpose, or for non-compatibility of customer-provided mobile devices required to use the system (including internet connection availability), or for third-party supplier services or products.

Any additional costs associated with internet connection or application updates invoiced by the customer's mobile phone operator are the customer's responsibility.
