

FACT SHEET

STORAGE UNDER CAB

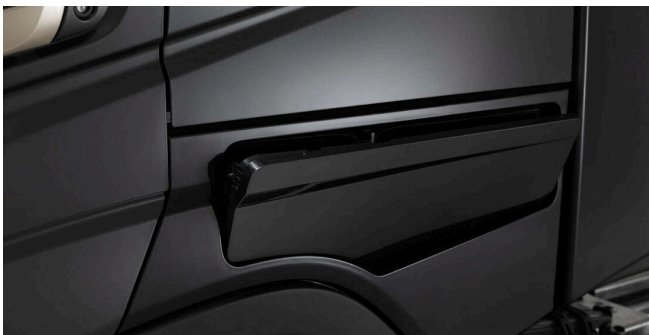

Extra storage under cab

Additional to the normal exterior cab storage, which is included as standard, there are extra plastic storage compartments on the left and right side. These are unheated.

The storage is divided in two sections and the openings are 85x215 mm and 105x350 mm, and the depth is 635 mm. The volume is approximately 30 litres. The smaller compartment can accommodate a freshwater tank of 7 litres (accessory). To open the storage, the door must be opened since the release mechanism is placed in the door-opening area.

Sales variants

- STUC-L** Extra storage compartment under cab, on left side
- STUC-R** Extra storage compartment under cab, on right side
- STUC-B** Extra storage compartment under cab, on both sides

DRIVER APPEAL

- Offers generous space for equipment.
- Storage for dirty equipment.
- Water tank (accessory) for drinking or washing hands.

The freshwater tank is an accessory.
