

FACT SHEET

# TELEMATICS GATEWAY

## Telematics Gateway

The Telematics Gateway enables connectivity services for the truck. Examples of these are:

- Dynafleet (e.g. Fuel & Environment, Driver times, Positioning)
- Uptime services (e.g. Truck monitoring, Connected Service planning)
- Vehicle Services (e.g. I-See)
- My Truck (smartphone app that monitor and steer certain functions in the truck)

See separate fact sheets for more information.

The Telematics Gateway includes a hardware unit with SIM-card and a roof antenna for communication via 2G/3G/4G mobile networks.

The TGW-PK variant is a preparation kit to enable retro-fitting of the Telematics Gateway.

### Sales variants

**TGW-PK** Telematics gateway preparation kit.

**TGW-4GWL** Telematics gateway with 4G modem and WLAN.
