

FACT SHEET

## EXTRA CAB INSULATION

XINS-CAB Extra thermal cab insulation, rear and side walls

### Extra thermal cab insulation, rear and side walls

For trucks operating in cold climate, this option offers an extra layer of insulation of the cab's roof, sidewalls and back.

Extra insulation contributes to a pleasant indoor temperature and a low noise level, by effectively shutting out cold and noise. The temperature is maintained at a comfortable level without unnecessary losses of energy. The execution is especially adapted for cold climate and is available for all sleeper and Globetrotter cabs.

XINS-CAB increases the weight by 2.5 kg.

### DRIVER APPEAL

- Increased cab comfort in cold climates.
- Contributes to a low noise level in the cab.
