EXTRA CAB INSULATION

XINS-CB2 Extra thermal cab insulation, rear (double layers) and side walls

Our highest level of insulation, XINS-CB2, assures a comfortable working and resting environment also when the truck is used in harsh conditions.

XINS-CB2 features further improved insulation characteristics and lower energy consumption for warming up/cooling down the cab interior when the exterior conditions are tough, in both cold and hot climates.

The insulation contributes to a pleasant indoor temperature and offers increased comfort and resting quality for the driver. In combination with a parking heater or cab parking cooler, the comfort is increased even more.

XINS-CB2 is developed and designed for the Volvo FH, FH16, FM and FMX sleeper cabs.

Additional insulation options:

Sales variant	Cab type	Parking heater	Insulation position
S99719	All	PH-CEC/UPARKH	Under the bed plates and luggage lid
S99720	All	PH-CAB2	Under the bed plates and luggage lid

DRIVER APPEAL

- Increased driver comfort in both cold and hot climates.
- Quick warming up or cooling down of the cab.
- Contributes to a low noise level.

ENERGY EFFICIENCY

- Less energy is needed for warming up or cooling down the cab.
